P-CAP TOUCH DISPLAYS

P-CAP TOUCH DISPLAYS

Visionair-e PCAP Touch Displays combine cutting-edge touch technology with premium visual performance to create powerful interactive experiences. Utilizing 10-point projected capacitive touch, these screens deliver ultra-responsive, fluid interaction, perfect for collaborative and user-driven content. High-resolution 4K visuals are brought to life through commercial-grade IPS panels, ensuring vibrant colours, exceptional clarity and a wide 178-degree viewing angle. Designed for continuous 24/7 use and featuring a built-in operating system, Visionair-e PCAP displays are perfectly suited for schools, retail environments, museums, corporate installations, exhibitions and other high-traffic public spaces where reliability and engagement are essential.

24/7 USAGE

The commercial-grade panel is designed for true 24/7 operation, delivering uninterrupted performance and consistent, high-quality visuals. Built for reliability, it ensures long-lasting durability and clarity across demanding environments.

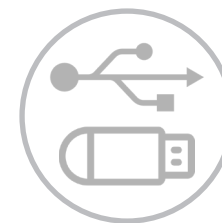

OPTIONAL OS

Optional built in windows operating system allows for quick setup, effortless content management, and smooth performance — all without additional hardware.

WIDE VIEWING ANGLE

Thanks to its wide viewing angle, the screen maintains vibrant, high-brightness colors that can be enjoyed clearly and without interruption from virtually any direction.

PLUG AND PLAY

Featuring HDMI and USB inputs, the plug-and-play design enables rapid deployment and instant content playback with minimal installation effort.
