VANITY MIRROR TVS

Vanity Mirror TVs seamlessly bring entertainment to any bathroom through the use of our specialist high reflective bathroom mirror with a built in TV. This creates our Vanity Mirror TV solution available with a 21.5" or 32" Bathroom TV. Our Bathroom Mirror TVs are available as a number of standard sizes to choose from or can be completely custom made to fit the customers exact specification on size and positioning of the TV. Here at VISIONAIR-E we understand the need for complete customization in our clients projects, our Bathroom Mirror is available in sizing up to 96" x 72" and one or multiple TVs can be selected depending upon the clients requirements.

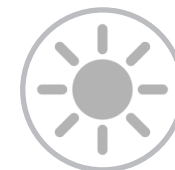

VISIONAIR-E utilize a 1000 nits high brightness panel with our bathroom mirror TV, this increased brightness helps the content shine through the highly reflective bathroom mirror, however when the TV is turned off, our bathroom mirror completely hides the built in TV and a seamless mirror is left.

The TV we use, due to its high brightness panel, also acts as its own defogger, meaning the image will not be impacted in steamy environments.

Customers can choose between one of the standard vanity mirror sizes or can instead order completely custom mirror glass sizes with a choice of 21.5" TV and 32" TV.

MIRROR ADVERTISING SCREENS

REFLEXIO Mirror Advertising Screens are a popular choice for customers looking for a Digital Signage Screen with a difference. Available in standard screen sizes from 32" - 86", these Magic Mirror retail displays incorporate a 24 / 7 commercial grade monitor with our REFLEXIO highly reflective optical mirror technology. This product is the ideal solution for changing rooms, fashion / department stores, gyms / SPAs, cosmetic counters, car showrooms, restrooms and much more...

The FHD / 4K displays also include inbuilt speakers and HDMI / VGA inputs for connecting to other media sources. These are the ideal product for hassle-free advertising within your business; the simple plug and play allows for a quick set up without the need for any specialist skills.

Our Mirror Advertising screens are also available as interactive displays. The advantages of Touch Screen Mirror displays are vast, offering customers, visitors and users a unique and innovative experience whilst serving its intended function. From engaging with videos / games to selecting products, the applications of a high quality mirror display are limitless, allowing audiences to interact with the content / images being shown on screen. The uses of this alone serves a wide range of retail, fitness and health care applications, from interactive mirrors in gyms, changing room mirrors in fashion stores, to hair / makeup mirrors in department stores and salons.
